

Proper Breastfeeding Position

母乳哺餵的姿勢

- ★ Mother is in a comfortable chair with support for her arms and her back - note that she's not hunched over.
- ★ Mother is supporting her breast with her thumb well above the areola, and her palm and fingers under the breast well away from the areola.
- ★ Mother's arm is supporting her baby's back, with her hand on the baby's buttocks or thigh.

- ★ Baby is across the mother's stomach with the face and knees close-in facing the mother's body - they're tummy to tummy.
- ★ Baby's head is in the bend of the mother's elbow, with the mouth directly in front of the mother's nipple.

- ★ Baby's head is tilted slightly higher than the feet.
- ★ Baby's lower arm can be tucked around the mother's waist, out of the way .
